

Alkaline water uses

Alkaline water has many uses including cleaning, cooking and personal care.

Make Smoothies

Brewed Beverages

Green Cleaning

Indoor Plant Care

Dental Hygiene

Food Preparation : Cooking Rice and Grains, Coffee and Tea, Washing Produce, Cooking Vegetables, Soups and Stews, Smoothies, Seafood, Tenderize Meats, Ice Cubes, Revitalize Leafy Green Vegetables

Cleaning Home : Laundry, Carpet Cleaning, Kitchen, Bathroom

Around The House : Fabric Freshener, Plant Care, Dental Hygiene, Pet Care, Personal Care

Acidic water uses

After Shave

Cut Flowers

Cleaning

Sunburn Salve

Wash Produce

Astringent Effects : Skin Breakouts, Washing the Face, Hair Care, Shaving, Bathing

Eco-Friendly : Water Plants, Fresh Cut Flowers, Bleach, Cleaning, Hand Sanitizer

Skin Conditions : Athlete's Foot and Nail Fungus, Burns, Chapped Hands, Eczema, Insect Bites, Minor Cuts, Scratches, Abrasions, Sunburn

Disinfecting it Properties : Food Preparation, Odors, Dish Washing, Dental Hygiene, Pet Care

Stay Alkaline, Stay Healthy

“No disease including cancer, can exist in an alkaline environment.

DR. OTTO H. WARBURG Nobel Prize Winner

- Remaining **3%** is also contaminated with Full of Toxic Chemicals, Acids which **Removes Natural Alkalinity**
- Can Remaining **3%** be made natural again with the help of **water purifiers?**

Water Purifiers

- Water Purifiers can **Only Filter** your Water
- They **remove** the **Harmful Germs** and **Healthy Minerals**
- The water may be Pure but it is **not Healthy**
- Acidic pH **Sucks the Minerals** from your Body

How much water body need

Water Composition Of The Human Body

We know that by Drinking Impure Water causing so much Harm to our body whereas Alkaline is so much important for our Survival

Impure water causes:

Then what is the solution?

Make your family medicine free with HYDRAZEN Alkaline Water Ionizer

Future of water Technology

7 Ways Alkaline Water Helps You Stay Healthy

- Hydration:** Enhances hydration due to their smaller molecular cluster size, allowing for better absorption and hydration at the cellular level.
- Antioxidant Properties:** It possesses antioxidant properties, which helps in neutralizing harmful free radicals in the body, potentially reducing oxidative stress and supporting overall health.
- pH Balance:** Consuming alkaline water assists in maintaining a balanced pH level in the body, mitigating the effects of excessive acidity and promoting a more alkaline environment.
- Bone Health:** It contributes to bone health by aiding in the regulation of acid-base balance, potentially reducing the risk of bone resorption.
- Digestive Health:** Relief to individuals with acid reflux or gastrointestinal issues by helping to neutralize stomach acidity and promote a more alkaline environment in the digestive system.
- Detoxification Support:** It supports detoxification by assisting the body in eliminating acidic waste products, potentially enhancing the efficiency of the detox process.
- Weight Loss:** Alkaline water aids weight loss by naturally neutralizing body acids, reducing fat storage, and facilitating easier weight management.

Acidic Water

VS

Alkaline Water

- ORP is Positive
- Less in Minerals
- Plastic Leads to Cancer
- No Micro-Clustered Molecule

- ORP is Negative
- Rich in Minerals
- No Such Problem
- Micro-Clustered Molecules

Alkaline Water

VS

Alkaline Water Ionizer

- Alkaline Water doesn't have Antioxidant Properties
- Alkaline Water is Made Using Inorganic Salts (Sodium Bicarbonate) which can be harmful
- Alkaline Water has Positive ORP when it is made using Inorganic Salts and Substances

- Alkaline Ionized Water is Full of Antioxidants
- Alkaline Ionized Water can only be Made Using Electrolysis
- Alkaline Ionized Water has a Negative ORP which is the Scientific Proof of Antioxidants

You can trace every sickness, every disease and every ailment to a mineral deficiency
